QOGNIFY GAMING SOLUTIONS

ENHANCE SECURITY OPERATIONS AND
IMPROVE BUSINESS PERFORMANCE

GETTING THE RIGHT INSIGHTS TO THE RIGHT PEOPLE AT THE RIGHT TIME

ENHANCE SECURITY OPERATIONS AND IMPROVE BUSINESS PERFORMANCE

Each year, more than 250 million visitors enter casinos worldwide, including individuals whose intent is nefarious or even criminal. Casinos are left with the task of identifying them and then tracking, recording and preventing their potentially criminal actions. Whether it's an attempt to cheat or scam at table games, the manipulation of slot machines or fraudulent liability claims — they cost your casino millions of dollars annually. Finding a solution to mitigate these risks and protect your casino from these types of losses, is just the challenge that Qognify gaming solutions respond to.

Qognify offers tailored security solutions specifically designed for casinos and gaming that deliver effective front-line defense with proactive security features utilizing innovative video surveillance technology.

Comprehensive in nature, Qognify's gaming solution also provides the best second line of defense — knowledge. In the event that an incident does occur, gaming operators are armed with recorded evidence of exactly what happened and when. Qognify offers a unique and

revolutionary incident information management solution that enables casinos to aggregate, manage and share incident information and evidence, all in one place. As a result, investigations and incident follow-up are markedly streamlined and more effective.

Qognify gaming solutions provide a complete range of casino surveillance, applications and services. Gaming organizations can now benefit from total multi-media capture, analysis, reporting and evidence disclosure needed to combat the unnecessary losses posed by criminal and fraudulent behavior.

QOGNIFY GAMING PRODUCT PORTFOLIO

Qognify helps surveillance operators to maintain game integrity, settle disputes effectively and ensure business continuity by offering three main product features.

Surveillance-Tailored User Interface

The Qognify control interface, named FAST Alpha, is designed to fit the particular needs of surveillance operators. The intuitive, easy-to-use user interface improves response time and personnel productivity while efficient investigation tools reduce dispute settlement time and improve table productivity. The integrated map functionality makes it easy to position and locate cameras throughout the casino premises. A full virtual matrix enables cost savings as well as collaborative event management for improved event response.

Zero Points Of Failure

Qognify's gaming product suite features non-stop video recording to keep your casino running 24/7. Our unique, patent-pending fail-over technology provides an automatic and seamless change over to back-up units in the event of a component failure. Qognify's field-proven products deliver an unprecedented level of resilience at all system levels to prevent costly interruptions, ensuring reliable video monitoring.

FAST Alpha User Interface

Single Point For Evidentiary Aggregation

Qognify products integrate with the full spectrum of casino third-party systems including PoS, table and slot management systems, incident management, and others. Trigger your CCTV system with alerts coming from your pit or slot management system to automatically display a predefined monitor layout showing all relevant video of an event. Qognify's sophisticated gaming products enable fast, informed decision-making using complete alarm management and instant verification tools. Avoid potential losses by improving event response and verification on your gaming floor.

Powerful Investigation

Today, gaming operators face increasing challenges investigating cases and expeditiously delivering the evidence needed to convict criminals and fraud. Getting the right information in the shortest time possible has become essential in solving crimes and delivering indisputable evidence. But with all of the different data sources available, the amount of raw, unstructured video and audio data keeps growing and in most cases remains incomplete due to the inconvenience of accessing it. Now, security operators can rely on a powerful investigation tools provided as a part of the FAST Alpha Viewer application

FAST ALPHA VIEWER PROVIDES POWERFUL TOOLS TO FIND THE VIDEO AND AUDIO YOU NEED, QUICKLY AND EASILY.

- Use advanced search options by time, date and camera; by detected events; or complex conditions
- Show events and alerts according to the integrated subsystem
- Get a one-click display of events based on predefined times and layouts
- Synchronized playback and control of multiple cameras
- Automatically filter video to watch relevant events only. For example, find movement in a particular area within a specific timeframe
- Save commonly used searches for one-click reuse
- Create advanced reports and graphs to understand complex security events and more
- Export events for forensic examination to portable media
- Archive evidence to local or networked storage
- Export or print event lists for case management and evidence

PROVEN TRACK RECORD IN GAMING SECURITY

- Install base of over 180 casinos worldwide
- Leading-edge technology with over 20 years of video technology expertise
- Focused approach to the gaming vertical with dedicated personnel and specifically developed solutions
- Extensive network of certified partners and resellers in over 140 countries
- Technology approved internationally by more than 10 Gaming Boards
