

VisionHub
VMS⁺

Take physical security to the next level.

With rising global insecurity, a growing extent of regulations and an increasing number of surveillance cameras worldwide, demands on companies that place a premium on their physical security intensify. All this leads to new challenges for organisations, such as:

- How can I respond to physical security threats?
- How can I leverage information in order to create a holistic view of incidents?

To answer these questions, VisionHub VMS+ combines the assets of an enterprise-class VMS with superior workflow support, situational awareness and management capabilities.

Where does VisionHub VMS+ add value?

Transportation

Transportation hubs and providers such as airports, seaports and railway operators are highly regulated environments that rely on a high level of security and guided workflows to maintain continuous business operations.

Higher Education

Higher education institutions have to make sure they are safeguarding students by maintaining a secure environment and immediately respond to/clarify incidents of theft and violence using enhanced situational awareness and visualization tools

Critical Infrastructure

Nuclear Power Plants, Utility and other Energy providers need to always maintain full operational awareness and require a holistic view of all systems at any time.

VMS+ KEY BENEFITS

With the VMS+ approach Qognify takes video-based physical security to the next level. Instead of just recording and displaying video streams, VisionHub VMS+ creates a holistic view of a situation, enabling fast and targeted responses in order to minimize the impact of an event.

ENTERPRISE-CLASS CONFIGURATION

Designed to fit the challenges of enterprise-scale organizations that allow for aligning global process, hardware and IT standards.

ADVANCED RESILIENCY

Flexible options, leveraging the latest in hyper-converged infrastructure technology, reducing risk of lost video while saving hardware cost.

INCIDENT RESPONSE MANAGEMENT

Actionable guidance and collaboration throughout the resolution process

SITUATIONAL AWARENESS

Full picture of incidents as they happen – in real time or with hindsight

SERVICE AND SUPPORT

Deep bench of professional service offerings throughout the project lifecycle

3RD PARTY INTEGRATIONS

Industry's largest library of existing 3rd party integrations, e.g. access control, fire or perimeter protection.
