QOGNIFY SITUATOR

RESOLVE INCIDENTS FAST AND STREAMLINE YOUR OPERATIONS

Qognify Situator is the leading enterprise incident management solution which integrates and correlates information in real time from multiple and diverse systems across the enterprise.

At the same time, it coordinates the most effective responses, ensuring that everyone in the operational chain knows what is happening, where it's happening and how to respond. Qognify Situator provides the tools necessary to address every aspect of the incident management lifecycle.

WHY GO CLOUD?

EASIER DEPLOYMENT – MORE PEACE OF MIND

Situator in the cloud provides an intriguing alternative to a standard software installation on premise, where you have to build the server, install the application, and configure it. Instead, the application resides on the cloud and works like a rental. You have the authorization to use it for the period of time you are subscribing, while resting assured that upgrades, maintenance, and a degree of client support are already included in your monthly fees.

This is also true for all questions regarding cybersecurity, since the Qognify Situator in the cloud services are provided by secure IT systems (AWS) that will satisfy the security needs of even the most demanding customers.

OUR OFFERING – YOUR BENEFIT

Qognify Situator as SaaS (software as a service) has a lot to offer. Our cloud solution can help your business save money, time, and human resources. Please get in touch with our sales team to thoroughly discuss your cloud options on an individual basis.

BASED ON AWS INFRASTRUCTURE

- Globally available
- Highest security standards
- Resilient
- Scalable

SUBSCRIPTION

- Fixed and predictable cost
- Including Virtual Control Room Clients priced as seats license
- Trade heavy capital expenditure into scalable operational expenses

MANAGED SERVICES
